I just wanted to drop a line to say how much I have enjoyed FIS1311 this semester. I have enjoyed the mixture of delivery methods and the number of hands-on activities we were assigned. I feel as though the content was fresh (blogs and rss) and very applicable to my position in a library digital services department. The activities introduced experiential learning into the course, which you don't often find in FIS courses, and I benefited from this greatly. Professor Friesen brings a lot of new ideas to FIS and is extremely knowledgeable in his area of study.

I hope this is the beginning of a new direction for FIS, one where online courses are offered and content follows the flow of real world development.

Thank you for your time,

Jennifer Peters-Lise
